

Please see the information from our region concerning Covid-19 cases, active cases, recovered cases, and deaths. Most of the total cases in our region are between the ages of 20-59, but most of the deaths are from patients 65 and older. This reflects the national trends with identical information. Please continue to keep our older populations safe in every way possible while finding ways to provide for their social interaction needs. Creative ways to communicate with vulnerable populations can be found at <https://acl.gov/oam/2020/oam-2020-activity-ideas>.
